CEPH Goals and Objectives As of 3/20/2015

Confers public health values, knowledge, and skills through coursework, service practice and field experience. Outcome Measure 1a. An expanded curriculum for employed and geographically remote students including distance-mediated and accessible course offerings. Target 1: 75% of online MPH students will report professional experience in the field of public health prior to matriculation. Target 3: Expand online elements of residential courses, including hybrid courses, flipped classrooms, distance-mediated contact. Target 1: A year-by-year increase of student publications in popular media, and presentations in public forums, including community and legislative hearings. Target 1: A year-by-year increase of student publications in popular media, and presentations in public forums, including community and legislative hearings. Target 2: The MPH Program will collaborate with campus partners to offer a minimum of 2 electives in writing and communication in public health per academic year. Target 3: 90% of required courses offered through the MPH Program will have obtained average scores of satisfactory or better (at least 3.0 on a 5.0 scale) on student evaluations of "the course as a whole". Target 4: 80% of annual student survey respondents will award an average score of good or above when rating the quality of the MPH curriculum. Target 5: Maintain a student-faculty ratio of less than 10:1 by 2018. Target 6: Increases in dedicated MPH office /conference/teaching space to accommodate growing enrollment and faculty. Target 1: Less than 5% of grades earned in the MPH Program will be Cs or lower. Target 2: Increase the number of professional training and networking opportunities. Target 1: Increasing percentage of field placements in underserved rural areas of Missouri.	Goal 1: <i>Instruction:</i> Implement and continue to refine an interdisciplinary, evidence-based curriculum that

practical experience, and staff/student interactions.	Target 2: 100% of core program components and 70% of optional campus- based activities will be distance-mediated and accessible to online students.	
Goal 2: <i>Research:</i> Create a focal point for public health discovery in the areas of policy development, veterinary public health, and health promotion by supporting a high-quality research agenda that encourages student involvement and enhances the skills, knowledge, and expertise of the existing public health workforce. 2a. Faculty members and graduate Target 1: Increase in faculty/student submissions of work to peer-reviewed		
students involved in relevant public health research.	journals and/or presented at state or national conferences. Target 2: Provide program funding to a minimum of 25% of students and 50% of core faculty to participate in professional development and research opportunities annually.	
2b. Demonstrated excellence in research through publication in peer-reviewed journals and funding for research proposals.	Target 1: 75% of core faculty members with research appointments will have external or internal funding for public health research projects. Target 2: 90% of core faculty members with research appointments have at least one peer-reviewed publication each year. Target 3: An increase in core NTT ² faculty research, as measured by: 1) Increase in number of MPH research group forums/activities. 2) Peer reviewed publications/abstracts by NTT faculty.	
2c. Relevant research findings from MU faculty members and students are made accessible to state agencies and other community partners.	Target 1: Number of faculty and student presentations at conferences and professional meetings. Target 2: Number of research-focused presentations of faculty research to lay and professional audiences via grand rounds, health department inservices or other place-based programs.	
Goal 3: Service: Partner with public health agencies and local and state government to improve the health		
status of Missourians through direct public health service and workforce development.		
3a. Recruitment policies that attract prospective students from underserved segments of the state's public health workforce.	Target 1: 20% of each entering class of MPH students will be comprised of racial or ethnic minorities. Target 2: 15% of each entering class (including both MPH and Grad Certificate students) will reside in underserved areas of the state as defined by counties with a population of 50,000 or less (campus and distance students listed separately).	
	Target 3: 50% of each entering class (including both MPH and Certificate) will have had some professional experience in public health or will be currently employed in public health professions.	
3b. A culture of service among faculty and students supported by a range of opportunities.	Target 1: 50% of students surveyed in the Annual Survey will report having participated in at least one extracurricular service activity during the academic year. Target 2: 80% of core faculty members will be contributing to public health	
20 Program ounnert for and	through service at the local, state, regional, and/or national level through volunteer work, service on boards, translation of research into public health practice, and other service activities.	
3c. Program support for and participation in continuing education and workforce development. Goal 4: Collaboration: To foster an environ	Target 1: Increase the number and scope of continuing education for targeted workforce populations. In a support of collaboration in which the MPH program supports opportunities for	
faculty and students to work with local, national and international partners to improve public health outcomes through shared knowledge, non-duplication of efforts and best practices in research and practice.		
4a. Establish and sustain a system of development program to increase	Target 1: Increase external contributions towards development funds.	

program funding.	
4b. Establish and sustain a fiscal	Target 2: Allocate at least 10% of annual operating revenue as reserve
operating infrastructure to promote	funds as reflected in the main financial account ending balance per fiscal
long term sustainability of the	year.
program.	
4c. Increased formal interdisciplinary	Target 1: The MPH Program will increase the number of Memoranda of
initiatives with campus partners,	Understanding with internal and external partners.
including dual degrees, high impact	Target 2: Increase in public health oriented faculty that have a formal
symposiums and research	affiliation with the MPH program as measured by membership in the core
collaborations.	faculty, the public health research group or acceptance of a courtesy
	appointment with the program.
	Target 3: 60% of all faculty members will serve on at least one Faculty
	Subcommittee.
	Target 4: By 2018, increase to 8 the number of interdisciplinary proposals
	submitted for internal or external funding. ³
4d. Expanded global health	Target 1: Increase participation in International organizations, and
collaborations on campus and with	collaborative efforts with foreign institutions and local partners with
international organizations.4	international projects.
